

CORE COMPETENCIES

- SW Software Development**
Custom web apps, API integration, full-stack engineering, and legacy system modernization.
- PA Process Automation**
Workflow digitization, document handling, and operational efficiency solutions.
- DA Data & Analytics**
Interactive dashboards, data pipelines, and decision-support reporting tools.
- AI AI & Emerging Tech**
AI-assisted workflows, intelligent automation, and knowledge management systems.
- WB Website Development**
Accessible, mobile-responsive government websites and CMS implementations.
- CX CRM & Citizen Engagement**
CRM setup, communication automation, and constituent engagement workflows.

DIFFERENTIATORS

- Direct senior-level involvement on every engagement
- End-to-end delivery: design, development, and deployment
- Fast turnaround on scoped digital projects
- Accessibility-first, cloud-native technology stack
- Outcome-driven solutions — practical, not over-engineered
- WOSB + VOSB certified — dual set-aside eligible

PAST PERFORMANCE

Enterprise Digital Transformation

Subcontractor via Turnberry Solutions | Global Market Engagement

Scope: Full platform rebuild for a global consumer brand in the specialized cycling industry. Led full-stack development supporting migration to a headless CMS architecture enabling scalability and modernization across international markets.

Outcome: Delivered a modern, flexible web platform capable of supporting global digital operations — improving performance, content flexibility, and long-term maintainability.

Website Development — Small Business Clients

Multiple Commercial Engagements | Various Industries

Scope: Designed and delivered responsive WordPress and custom web solutions for small business clients. Work included CMS implementation, mobile-first design, and digital presence buildout.

Outcome: Clients gained professional, accessible, and maintainable online presences with improved constituent/customer engagement.
